

# Floor Plates

## Optical Turnstile Floor Plates

These turnstile floor plates provide a solution when core drilling and attachment directly to the floor are not an option. This modular system can be laid out on a finished floor and will provide the necessary mounting bolts and wiring channels for the turnstile installation. No floor penetration is necessary. Floor plates can be custom designed and fit for most locations and turnstile designs.

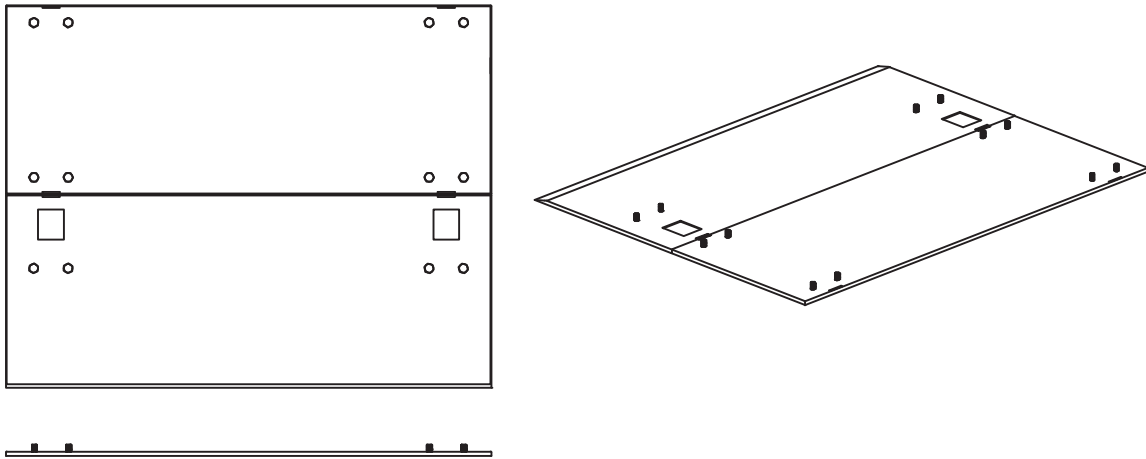

### FEATURES & BENEFITS

- Conforms to ADA specifications
- Speeds up installation
- Reduces preparation cost
- Avoids floor damage
- Ideal for temporary applications
- Made in the U.S.A.

## FLOOR PLATES

### SPECIFICATIONS

- Length and width varies per turnstile application
- Maximum height is 2"
- Ramp angle meets ADA requirements
- Material: Cold Rolled steel
- Finish: powder paint (standard color is black)
- Mounting hardware & cable trays built into floor plate

### PRODUCT DESCRIPTION

Designed for applications where core drilling and trenching for mounting or cabling would be prohibited. This modular floor plate is constructed using heavy gauge cold rolled steel and is coated at the factory using durable powder paint. Color can be matched to a specific requirement. DSI has many floor plates to fit a wide variety of the turnstiles we offer.
